

For families of children ages 8 to 17 years of age with AAOCA

You are being invited to make an impact on the lives of present and future people diagnosed with Anomalous Aortic Origin of a Coronary Artery (AAOCA)!

As a participant of the AAOCA registry, we are inviting you to participate in a *brief exercise survey*, that will help us understand the impact of AAOCA on exercise participation.

By completing the survey, you are effectively improving outcomes for people with AAOCA!

The exercise survey:

Will take about 15 minutes to complete;

The first part of the survey is for the Parents to complete;

The second part of the survey is for the kids/adolescents to complete independently, *they should be choosing their OWN answers!*

Please be sure to click "Submit" at the end to submit and close the survey.

To engage in the survey, click the QR code below:
